REPORT OF HEALTH OFFICER

I herewith submit my report as Health Officer for the year ending January 31st, 1942.

The following contagious diseases were reported to me:

1 Syphilis	6 Measles
2 Gonorrhea	6 Chicken Pox
4 Whooping Cough	6 Scarlet Fever

Those of the above that are required were quarantined and the premises disinfected when patients had recovered. I have had several complaints all of which were investigated.

I collected from the milk dealers at three different times samples of milk and sent them to the State Laboratory of Hygiene for analysis, two of the collections (no criticisms) and one had excessive bacteria and B. Colon organisms and was hand capped which is in violation of the regulation requiring use of a mechanical capper.

Several samples of the Epping town water were sent up to the Laboratory with the following report. Good, but for a substantial trace of iron. Most of the samples showed a decrease in iron content from the 1940 reports.

In conclusion let me remind the good people of our town that we have health regulations and laws which we are expected to comply with. Let us try to do so, co-operate with your Health Officer and try to make our town a cleaner, healthier and better place in which to live.

GEORGE A. GILMORE,
Health Officer.
